

John Santiago

OUTSTANDING ACCOUNTING STUDENT

Ours second Outstanding Student in Accounting is John Santiago.

John is an excellent student with aspirations to pursue a career as a Certified Public Accountant. As part of the capstone course that every business student must take, John competed, as part of a small team, in a very realistic, semester-long simulation in which students manage all aspects of a virtual company. The competition involves teams of business school students from Colleges and Universities around the world. With John's help, his team managed to finish first, among the 4,593 teams from 287 Colleges and Universities competing around the globe.

For the past two summers, John has served as an intern with Wentworth Property Management in Newark, NJ. His ability to conduct business in both English and Spanish and his training in financial analysis made him a very valuable asset to the company.
