Barbecue Policy:

- Fires may only be ignited on the stationary grilles provided by the College. They are currently located near the Village, Laurel Courts, the Lodge and the Pavilion.
- Individual barbecues/gas grills are prohibited on Campus.
- Accelerants such as: lighter fluid, charcoal, propane, gasoline, etc. shall not be stored in residence halls. They are fire hazards and charcoal produces carbon monoxide.
- The stationary barbecues on Campus are permitted annually by the State Fire Marshal's Office through the office of the College Fire Marshal.
- Barbecues that are not cleaned after each use are a potential fire hazard; and unclean barbecues may cause the annual permit to be suspended or rescinded. That would initiate a temporary or an extended closure of the barbecues. Therefore, all users shall properly dispose of used charcoal briquettes and all ash when finished using the stationary grills. Please ensure that briquettes and ash are being disposed of in the metal drums, which are provided at each barbecue area.
- Do not abandon used charcoal briquettes and ash in the grill or on the ground. Call Facilities at 7660 if you find the metal drums full or missing.
- College policies regarding noise/quiet hours, trash and alcohol must be observed at all times.
- Any member of Public Safety, Residence Life, the College Fire Marshal and State Fire Inspectors are some of the persons who may shut down a barbecue if it appears that health and/or safety are in jeopardy.
