Learning Goal and Measurable SLOs for the Course Enrichment Component

ARC and Design Team, March 23 2011

Goal: Each student will participate in five or more hours of unmonitored experience(s) outside the classroom designed to enhance student learning in the course.

Outcomes
(All courses should include one or both of these outcomes, as appropriate)

- demonstrate how an out-of-class activity applies knowledge obtained in the classroom
  o The activity would be a hands-on / minds-on activity, e.g. fieldwork, lab-type activity, creative work, etc.
  o Examples of Instruments (assignments): a lab / field report; embedded question(s) on exams; research material incorporated into existing paper as a source; oral presentations/reports; creative works.

- Demonstrate how your learning of the course material is connected to and enhanced by the out-of-class activity
  o Examples of Instruments: reflection paper; embedded question(s) on exams; research material incorporated into existing paper as a source\(^1\); oral presentations/reports

\(^1\) E.g. assignments where students conduct interviews outside of the classroom, and use those interviews as primary sources
