How to Setup Webex Meetings/Personal Room Sessions from Google Calendar, and Add the Meeting Information Into Canvas

You can hold your class sessions through Webex either by using Webex Personal Rooms or by scheduling Webex Meetings. When you want to post your Webex meeting/personal room information to Canvas, you can do it in multiple ways. Putting up the meeting information in Modules or in Pages are two of the most common ways to do it. In this guide, we will look at how to schedule a Webex Meeting or Webex Personal Room invite using Google Calendar. We will then look both into how to add Webex Meetings information and how to Webex Personal Room information into Canvas so that students can access your Webex sessions.

For Webex Meetings, this guide will show you how to add relevant information to your Modules and for Webex Personal Room, this guide will show you how to add relevant information to one of your Pages. You can just as easily switch these around and add Webex Meeting information to one of your pages or, if you are using the Personal Room feature, add the room information to your Modules. Webex and Canvas are flexible technologies which you can use according to your needs.

1. Go to cal.ramapo.edu
2. Once there, be sure you are signed in using your Ramapo gmail and not your personal email. You can check for the Ramapo icon on the top-right corner of the page to confirm you are using your Ramapo gmail.

3. Click on a point in your calendar (on a point corresponding to the time when you want to schedule your meeting). A new form should show up, as shown below:

4. Click on More options. You should be taken to a new page as shown below.
5. Type out a name for the personal room session in Add title.

6. You can adjust the date and time meeting by specifying them as shown below:

7. If you want the sessions to be recurring (if you are using it for weekly class meetings, for example), then instead of Does not repeat in the drown-down menu, select another appropriate option from the ones listed.
Note: If a recurrence scheme you want is not listed, click on Custom... in the drop-down menu. Here, you can customize the recurrence scheme in a very flexible way. In the scheme shown below, the event repeats every other Wednesday and stops repeating on March 10, 2021. Once you are done setting up the custom recurrence scheme, you can click on Done.

8. You can also set how much time before the start of a meeting the meeting reminder is sent to all the participants in the attendees list. In the image below, the notification is set for 1 hour before the start of the Webex session. You can choose between notifying attendees for the event using the Google
Calendar Notification system or using Email by clicking on the drop down that says Notification. Lastly, you can add multiple notifications using the Add notification button.

![Notification](image)

Add notification

9. In the Add description box, you can add a description for the session.

![Add description](image)

10. On the right hand side, you will see the Guests section. Here you can enter the email addresses of the people you would like to invite to the session. They will be sent the link and notifications for the session. You can click tweak guest permission by selecting/deselecting the options under Guest permissions. Usually, the default selections are ideal.

Getting list of student email addresses for your class from the Ramapo Web Self-Service:
1. Login to Web Self-Service with your Ramapo user name and password at ssb.ramapo.edu.
2. Navigate to Faculty & Advisors
3. Click Summary Class List
4. Choose the appropriate term and course, click Submit
5. Scroll down and click Display Email List
6. Scroll down to the box with Class List Email Listing
7. Copy the email addresses
8. Paste the emails into the Attendees option above

11. The next steps you take will depend on whether you are creating a Personal Room Session or a Webex Meeting.
a. Adding Webex Personal Room information to a Canvas Module:

1. Once you fill out the details for the Google Calendar event, make sure to select **Webex Personal Room meeting** under **Event Details**.

2. Right-click on **Join Webex Personal Room meeting** and click on **Copy Link Address**.

3. Once you are done, click on the **Save** button on the top-right hand side of the page.
4. You can simply email this copied meeting information to the people you want to have attend the meeting, or following the steps below, you can post the meeting information on Canvas so that students in your course can easily access the meeting information without having to go through old emails.

5. Go to ramapo.instructure.com to access Canvas. Sign in if you aren’t already.

6. Click on the relevant Canvas course

7. Go to the Modules section. Once there, click on the + icon on the module to which you want to add the information

8. Select External URL for Add, paste the link to your Personal Room that you just copied to URL, give the link a name under Page Name, and importantly, make sure Load in a new tab has been checked.
9. Finally, click on Add Item.

b. Adding Webex Meeting information to a Canvas Page:

1. Once you fill out the details for the Google Calendar event, make sure to select Webex meeting under Event Details.

2. Copy the Join Webex meeting link, ID and Password fields:
3. Click on **Save** on the top-right part of the page:

4. Go to ramapo.instructure.com to access Canvas and click on your Course.
5. Go to the **Pages** section by clicking on the navigation bar

6. Click on the page you want to add the meeting information to
