Space Management and Allocation Advisory Committee

Summary of Activity

The Committee engaged in activities driven by Fulfilling Our Promise Outcomes:

- Outcome 2d: Ramapo College is an inclusive, diverse, and supportive work environment.
- Outcome 4b: Decisions are made in consideration of their long-term financial impact and resources are focused on mission-critical endeavors that support the fiscal health of the College.
- Outcome 4d: College resources are allocated to ensure the long-term security and safety of its assets and the effective use of space.
 - Indicator 55: Increase existing assignable square feet of campus space repurposed or reallocated for student/instructional use.

The Committee reaffirmed its established principles of space management and allocation:

- I. Facilitating a high quality service-oriented learning environment for students is essential to the College's ability to recruit and retain students.
- II. Administrative and student service spaces should foster student engagement and/or complement the learning environment.
- III. Traditionally "back of the house" functions should be located in areas less trafficked by students.
- IV. Efficiency, while desirable, should not take precedent over effectiveness.
