

SIMPLIFY YOUR RECYCLING

5 EASY STEPS TO GET STARTED:

STEP 1:

Grab Two Containers

Whether you use new containers, repurposed boxes or reusable bags, set your recycling container next to the trash bin - this works for recycling in several rooms in your home or at work.

STEP 2:

Label Both Containers

Download and print Recycling and Trash labels at wm.com/recycleright, and place them on each container to ensure the right items go into the right bins. Remember - don't use a plastic bag in your recycling bin. Empty items directly into your recycling container.

STEP 3:

Start Recycling

Remember, recycling right is as easy as recycling clean bottles, cans, paper, and cardboard. Download Recycle Right posters from wm.com/recycleright and put on your refrigerator, or place them by the recycling bins at home and work.

STEP 4:

Better Together

Empty smaller recycling bins used throughout your home or business into your larger recycling bin - and remember to free your recyclables - no plastic bags.

STEP 5:

Keep It Up

The easiest way to be an avid recycler is to make a commitment to recycle right. Once you get into that groove, you'll find recycling seamlessly integrates into your everyday life. Then share your passion for recycling with family and friends, and make purchase choices based on recyclability.
