General Education courses can be done in any order with the exception of INTD 101, CRWT and MATH. Those three general education courses will need to be done first. First Year Seminar is taken in the first semester. Failure to complete CRWT and MATH will result in a hold when the student hits 64 credits. The following general education courses can be done in any order. For more info on these courses, please visit the [General Education program requirements website in the College Catalog](#):

- Social Science Inquiry (SOSC 110) [+W]
- Scientific Reasoning
- Historical Perspectives [+W]

- Studies in the Arts & Humanities (*CRWT 102 is a prerequisite to this course*) [+W]
- Global Awareness [+W]
- Distribution Category (Social Systems, & Society **OR** Culture & Creativity **OR** Values and Ethics) (**Must be outside of TAS**)
- Distribution Category

+W: Students transferring in with 48 or more credits are waived from these general education requirements.

****Offered in both fall and spring semesters**

¹Also satisfies Gen-Ed: Scientific Reasoning Category

²Also satisfies Gen-Ed: Quantitative Reasoning Category

For biochemistry major students, there are two different options to follow to be certified by the American Chemistry Society (ACS), (this is not required to graduate)

- Option 1: Complete Advanced Inorganic Chemistry Lecture (CHEM 451), Advanced Inorganic Chemistry Lab (CHEM 451L) and at least one semester of TAS Research Honors as electives
- Option 2: Complete Advanced Inorganic Chemistry Lecture (CHEM 451), Advanced Inorganic Chemistry Lab (CHEM 451L), Instrumental Analysis Lecture (CHEM 427) and Instrumental Analysis Lab (CHEM 427L) as electives
- These can be taken in the Spring semester of either junior or senior year

RE Although no additional electives are required to graduate, the Biochemistry Program strongly recommends taking optional recommended electives (see list of the recommended elective courses from biochemistry major requirements at www.ramapo.edu/catalog)

Biochemistry Program strongly recommends taking TAS Research Honors courses (SRSH 301, 302, 401 and 402) during the 3rd and 4th year for hands-on research experience. Students who complete all of TAS Research courses (SRSH 301, 302, 401, and 402) will graduate with TAS Research Honors Distinction.

C Biochemistry II (CHEM 446) capstone course is designed to draw from and build on content and skills learned during a student's progression through the major with a significant writing component. In undertaking this course, students will demonstrate: a thorough understanding of the relevant biochemistry material, an ability to apply problem-solving strategies, oral and written communication and presentation skills, an ability to comprehend and critically evaluate scientific literature. Senior presentation for biochemistry major will be one of the requirements for this course. Requires prerequisite CHEM 425

WI: Writing Intensive – 3 courses required in the major
