

MSW Field Assessment of Advanced Practice Behaviors

The "Field Assessment of Advanced Practice Behaviors" was created to capture field instructor feedback on the student's competence in the 31 Foundation Practice behaviors outlined by the Council on Social Work Education (CSWE), as well as 21 Advanced Practice Behaviors. Please answer each of the 52 questions reflecting the Advanced Practice behaviors using the Likert scale outlined below. In addition, please provide narrative feedback at the end of each competency.

Please refer back to the learning contract that you completed with the student at the beginning of this academic year for examples of each competency when completing this survey.

Please rate the student on each practice behavior using the following Likert scale:

1--Not competent: The student has not achieved even a minimal level of competence in this practice behavior, nor demonstrated any significant movement in this direction, even with supervisory input.

2--Developing competence: Though the student has not yet reached a desirable level of competence in this practice behavior, there has been a noticeable improvement in this direction. The student is responsive to supervision around this practice behavior.

3--Competent: The student demonstrates a basic level of mastery of this practice behavior that is consistent with what one might minimally expect from a student with this amount of experience. The student demonstrates responsiveness to supervision around this behavior to advance their skill.

4--Advanced competence: The student demonstrates a level of mastery of this practice behavior that is beyond the minimal expectations that one would have of a student with this amount of experience. Minimal supervision is required to support the further development of this behavior.

5--Superior competence: The student demonstrates a level of mastery of this practice behavior that is consistently beyond the minimal expectations that one would have of a student with this amount of experience, and that requires little to no targeted supervision.
