

Math Club Meeting #1 Wednesday, February 3, 2010

Welcome Meeting

We began the meeting with introductions of officers and faculty and welcoming any new members. We then enjoyed the customary free pizza and soda.

After that, we discussed the on campus tutoring opportunities and got several volunteers.

Next was the topic of off campus community service opportunities which was open to the floor. We came up with several great ideas but decided on a trip to Mahwah high school to give the students there an idea of what it is like to be a math major.

Information on Pi Mu Epsilon, a math honors society, was given and the math club members that were being inducted into this prestigious group were announced. The requirements to get into the society were also reviewed.

The New Jersey Undergraduate Math Competition is to be held this semester on Saturday, April 10 at Middlesex County College in Edison, NJ.

We concluded the meeting with two math competition problems.

Minutes Prepared by Meghan Mulharin
